God's Universal Laws

The Law of Gender

When we look at the Law of Gender there are two aspects of the Law that are important for us to understand. The first deals with the creation. God created man and then created woman from man. This means that if something were to exist it required unity male and female, positive and negative, ying and yang and so on. While God spoke of gender here it wasn't until they ate of the tree of knowledge of good and evil that gender made a difference. With the knowledge of good and evil Adam's and Eve's mind now saw each other as different – male and female. Before having eaten from the tree of knowledge, the emphasis of gender reflected unity of opposites (Law of Duality) in signifying a balance of energy. After having eaten from the tree of knowledge, the emphasis of gender reflected the physical Life – man and woman, ying and yang, positive and negative, good and evil, and so on. The second aspect of this Law deals with the growth process. We know that for anything to grow it has a gestation or incubation period. Everything begins with a seed and from that seed something grows over a period of time different from one seed to another – trees, plants, flowers, humans, animals, etc. Gender of a particular seed will only render like gender results. For instance, if you plant a blue berry seed and it grows into a blueberry bush it will only have blueberries as its fruit; it will not have strawberries, blackberries or any other berries other than blueberries. Humans can only produce other humans. Cows can only produce cows. Oak trees can only produce oak trees. And the list goes on and on. Something that is hidden in this Law is that the Law of Gender relates to everything surrounding our Life experiences. Whether it be success, prosperity, loving relationship, etc., the Law of Gender tells us that in each of these there is both a positive and negative aspect of each we will live and that based upon this Law the timing of receipt of these things we want and desire have a specific gestation or incubation period. It is through our thoughts and emotional intentions where we interact from our physical realm with the spiritual realm to manifest our wants and desires into our Life experience. When you create those "new" intentions for your life, you're drawing from the formless substance or the

spiritual world. This world is the unseen. No one knows how long it's going to take to create your intentions. However, all creation of form is a recreation from the spiritual world.²⁷
