## THE SOVEREIGNTY OF MANKIND

### PART SEVEN

We will continue to look within scripture at strange phenomena like Joshua to the day God moved the sun backwards and extended King Hezekiah's life fifteen years. and The time was 8<sup>th</sup> century BC, in the time of King Hezekiah of Judah reign. We find in 2 Kings 20 and Isaiah 38 this strange story. Hezekiah is lying on his deathbed, and he prays that God will spare his life. God grants his wish and says to Hezekiah that he will live another 15 years. As a sign of Hezekiah's healing, God makes the sunlight on the sundial move back 10 degrees.

Because Hezekiah was allotted 15 more years of life, his son Manasseh was born, and during his 55-year long reign, Manasseh did great evil in leading Israel into idolatry. This particularly evil king would have not been born if Hezekiah has just died from his illness, however, God still granted Hezekiah what he asked. God even offered to move the sun back on the sundial 10 degrees, altering the cosmos in the fulfillment of Hezekiah's request.

Now think about this as it relates to Earth and all its supposedly gastronomical links with everything in the Universe. This one event would have had an enormous issue for the entire Universe to deal with. What God did was just take the sun in its portal of operation and move it back not affecting anything within the Universe. Why? We will leave that in your hands to research.

The question, of course, is whether God changed the cosmos as a sign to Hezekiah, or whether the solar system (as science would have us to believe) was already in a transition stage, and God offered this sign because the Earth's orbit was getting shifted anyway. How does moving the sun have anything to do with the Earth. God is literal in Scripture. Had God's choice to move back the sun affected anything else why didn't He tell us so.

God allowed Hezekiah his sovereign request about a life extension. This is the same for you and I today!
