# God's Universal Laws

## The Law of Increase

Abraham probably did not know what was to happen when he reached the mountaintop other than he was going to obey God. But when he addressed Isaac's question about the lamb sacrifice Abraham was giving praise to God. He was letting God know that he trusted in Him and would obey him at all costs. In doing so, he allowed God to bless him with the benefits of the universe increasing the Abundance around Abraham – releasing his son from being sacrificed. Looking at the process surrounding this law we find that as we praise God we automatically increase our vibration level at a much higher plane that allows us to receive all the good awaiting on us. In doing so, we expand the mind by opening it up to God and through this we achieve the shortest route to manifestation of things into our Life experiences. The act of condemnation and criticism does the opposite.

The next law identified for us is the ***Law of Sacrifice***. Had it not been for the willingness to obey God, Abraham would not have received the Universal benefits of his actions.
