God's Universal Laws

The Law of Focus

This Law tells us that whatever we focus our attention on grows. This is one Law where the rubber meets the road. We are all 100% energy – everything even our thoughts are energy. This means that whatever we focus on and give thought too we energize “bringing to Life” – another Law discussed later called the Law of Manifestation – or co-creates out of the vast field of Universal Energy whatever experience we are focusing on. Have you ever said to yourself “My problems don't bother me if I don't think about them; or, I'm so busy feeling good that I don't have time to feel bad.” These two statements might sound ridiculous, but if you think about them, both contain vital truths about the way the mind works. We are consciousness and nothing else.

This is a great key to success in every area of life because it means that no matter what your situation is, you can change it by changing the focus of your attention. Thus, wise men and women understand how crucial it is to take control of their minds and focus their attention on objects or experiences of their own choosing—instead of being tossed around or influenced by outer circumstances and other people's opinions.²¹
