God's Universal Laws

The Law of Supply

When we think about the Law of Supply most of us will think of the economic law of supply and demand and not the spiritual Law of Supply. However, if we think about even the economic law of supply and demand we cannot have this law without having first the spiritual Law of Supply. It is through this spiritual Law of Supply that all is given. Now looking at this as it relates to the creation of Man, the commission of God and the relationships of the Universe supply takes on a broader meaning than provisioning for us. We have learned from the ancient writings that man was created in God's own image. As such, our lives in this physical form are never the victim of any unjust act or laws. We live in obedience to God's spiritual law of abundant supply. God's creation depends upon Him for its maintenance, enlightenment, and joy, and all these He invariably supplies. Wherever the demand is, supply flows to meet it as naturally as, to human sense, fresh air comes in when a window is opened.²⁹ To understand this principle of supply is key to the understanding that the Universe has an unlimited supply of everything and there is no shortage. Truly becoming aware of these infinite sources is vital to being able to attract anything into your life.

We pick up in the story of Noah in Genesis 9:7 where God repeats what he tells Noah in verse 1 but adds these words "... bring forth abundantly in the earth." When you consider the Law of Supply and these words together then we get the next law – The Law of Abundance. From it we are told to multiply and do it abundantly then what we have is an abundant supply of everything.
